

Pneumatic Foot Pedal Offers Consistent Dispensing

Challenge:

A medical manufacturer needed a sanitary and ergonomically sound way to dispense fluid. Their current application was inconsistent, dispensing various amounts of fluid depending on the pressure exerted on the push button.

Solution:

Bimba developed an easy to operate pneumatic foot pedal that sends a precise amount of air to a dispenser head with a simple press of the pedal. The pedal offers the consistency that was missing from the customer's current application.

Benefits:

- Clean, sanitary design.
- Ergonomic.
- Easy to operate.

Other Applications:

- Liquid Dispensing
- Safety
- Assembly
