PneuMoment Mounting Clamps

Insert the dovetail or angular side of the clamp into one of the mounting channels that run along the length of the guide beam. Either the top or bottom channel can be used depending on the installation orientation your application requires.

	PM-MC-09 1-1/16" (27mm) - 1-1/2" (38mm)	PM-MC-31 2" (50mm) - 2-1/2" (63mm)
Through Hole Diameter	.28	.41
Counter Bore	.42 x .31 DP (7.1mm/10.7mm x 7.9mm)	.61 x .43 DP (103mm/15.4 x 10.9mm)
Torque Specification	100 in/lbs. (11.3 Nm)	545 in/lbs. (61.5 Nm)

Insert your fastener through the hole and torque to the specification noted above for the mounting accessory purchased.

Important installation notes:

- The side switch tracks are not engineered for installation of the actuator.
- Install the clamp so that the entire width of the dovetail or angular side of the clamp is engaged in the guide beam channel.
