

UPTIME

TIME

Machine Efficiency
measure optimal
stroke time

Predictive Failure
diagnose cylinder issues
before they happen

HOW TO PREDICT

THE FUTURE

Production Improvement
move from emergency repair
to proactive upgrades

Remote Monitoring
collect data on cylinders
from multiple locations

WELCOME TO THE PNEU AGE OF CONDITION-BASED MONITORING

Introducing IntelliSense®, a one-of-a-kind technology platform that delivers real-time performance data on standard Bimba pneumatic devices for maximum uptime.
